The Tumble Forms™ range covers a wide variety of positioning needs and also includes a number of seating and standing options.

**Wedges**
A number of wedge options are available including a standard Wedge, a Biform Wedge which provides 2 positions in 1 wedge and a multi-positional Adolescent Thera-Wedge System. Strap options and pommels are also available with most wedges.

**Rolls**
Rolls are available in a variety of dimensions and there is also an option of Raised Rolls that come with a flat base to give the stability of a wedge with the positioning options of a conventional roll. A convenient roll rack is also available.

**Universal Side Lyer**
This light weight, hard wearing Side Lyer accommodates a wide age range of children from pre-school through to adolescence. The Side Lyer comes with an angled base and two soft, easy to use straps. An optional block module is also available to provide additional positioning.

**Tadpole Paediatric Positioner**
Designed for children aged from birth to 3 years, the multi-positional Tadpole can be used by the entire treatment team including occupational therapists and physiotherapists. The Tadpole is also ideally suited for use in the home environment for both parents and carers alike. The Tadpole includes a base, a half roll with two lateral supports, a wedge, a log roll, a tray with mirror and a large mesh carrying bag with shoulder strap.
Universal Grasshopper System
Incorporating 17 different positional modules, the Grasshopper allows the therapist to position adolescents and adults to meet a wide variety of needs. The mobile base allows for easy transport from room to room.

Feeder Seat and Deluxe Floor Sitter
The popular Feeder Seat provides basic positioning for any short term activity. Available in 4 sizes to suit infants through to adolescents, the Feeder Seat comes with a shoulder harness and quick release hip strap to help maintain the child’s position. With the addition of a Floor Sitter Wedge to become the Deluxe Floor Sitter, the seat can be set in a more upright or reclined position depending on the child’s needs. A tray and a mobile base are also available.

Sensory Motor
Tumble Forms™ include a wide range of sensory motor equipment including a Vestibulator with a number of swing options and a range of balance boards. Two of the most exciting products in the range are the Deluxe Tortoise Shell and the Deluxe Turtle.

Deluxe Tortoise Shell
This colourful, moulded shell is ideally suited for both vestibular therapy and sensory integration either individually or in a group. The Deluxe Tortoise Shell includes the shell with lid and net filled with bubble balls to provide buoyancy and sensory feedback. The Tortoise Shell can also be attached to the vestibulator with an optional suspension kit.

Deluxe Turtle
The Deluxe Turtle is a complete therapy system designed for vestibular stimulation and sensory integration therapy. The Deluxe Turtle includes a rocking turtle dome, a padded scooter, a T-stool attachment, a net swing with rope and ascender, a therapy booklet and complete Turtle methods manual.
Mobility

There are two fun mobility products in the Tumble Forms™ range.

Ready Racer
The Ready Racer is a pre-wheelchair mobility aid that combines high performance wheelchair handling with sports-car styling. Recommended for children ages 18 months to 5 years, it improves perceptual motor skills, strengthens the arms and upper trunk and allows the child to play at peer level. The Ready Racer requires minimal arm strength and is ideal for use in the home or any other indoor environment. An optional height adjustable handle is also available.

Jettmobile
Available in both child and adolescent sizes the Jettmobile facilitates development of upper extremity strength and endurance and incorporates sensory stimulating activity. The Jettmobile includes casters and a number of removable positioning shapes as well as a hip strap.
Manufactured in the US by Sammons Preston, our own US distributor, the high quality Tumble Forms™ range covers a number of areas including positioning, sensory motor and mobility. At James Leckey Design we are committed to bringing our customers in the UK and Ireland the entire Tumble Forms™ range of products and we are confident that these products will complement the James Leckey Design product range.

The exceptionally durable and hard wearing Tumble Forms™ covers are seamless, non-toxic, odour and stain resistant and completely washable.

All of the Tumble Forms™ products are available to order on a sale or return basis. We can also send out samples for you to try out before ordering. Our Leckey sales and customer service team will be able to advise you on all the products in the range and can send out a more comprehensive brochure including treatment tips on request.
